

USMAN ARIF

SOFTWARE ENGINEER | LARAVEL & FULL-STACK DEVELOPMENT

+923364238599 usmanarif.9219@gmail.com Lahore, Pakistan github.com/usmanarif-147

PROFILE

Software Engineer with 5+ years of experience building Laravel applications used in production. Strong in backend development, REST APIs, database design, and automated testing. Adaptable to new tools and team workflows, with a focus on clean code and consistent delivery.

WORK EXPERIENCE

JSYS Tech Aug 2025 – Present
Software Engineer — Full Stack

- Worked on a real-time chat system using WebSocket (JWT-authenticated) and a WebRTC voice/video calling module via LiveKit — within a microservice setup using Kafka for event streaming and gRPC for service communication.
- Developed features across PHP/Laravel and Rust/Axum services; wrote Playwright E2E tests, worked with sprints in Jira, and used Jenkins CI/CD pipelines with Git branching standards.

Horizam 2022 – Aug 2025
Software Engineer — Full Stack

- Worked on 7 full-cycle web applications covering database schema design, Redis caching, and REST API development for web and mobile clients.
- Migrated 2 legacy CodeIgniter applications to Laravel with full database redesign, and wrote automated tests using Laravel Pest. Integrated Stripe Connect, FCM, and other third-party APIs.

Softenica 2021 – 2022
Junior Laravel Developer

- Built REST APIs and backend services for client Laravel applications. Introduced automated testing practices to improve code reliability, and worked on optimizing SQL queries and legacy database structures.

KEY PROJECTS

RehabSuite — Real-Time Chat & WebRTC Calling System
JSYS Tech · Multi-tenant Physiotherapy SaaS Platform

- WebSocket chat engine with JWT auth, Kafka domain events, message reactions, read receipts, typing indicators, presence tracking, and edit-audit log.
- LiveKit WebRTC for voice & video calls — room token management, SFU streaming, call recording, and async Assembly AI transcription linked to chat timeline.

Tech: Laravel 12, Rust/Axum, Kafka, LiveKit, PostgreSQL 17, Kong Gateway, Docker, Playwright

Autotheory — Multi-Vendor Auto Services Platform
autotheory.com

- Multi-role platform for auto shops: vendor onboarding, service bookings, order management, Stripe Connect split payments, Redis caching, and FCM notifications.

Tech: Laravel, Livewire, Vue.js, Stripe Connect, FCM, Redis, MySQL

Workforce & Job Management System
thislinks.co.uk

- Role-based job and employee management with real-time dashboards, performance tracking, and daily FCM push notifications.

Tech: Laravel, Livewire, Filament, Alpine.js, Bootstrap, FCM, MySQL

SKILLS

Backend & Frontend
PHP Laravel Livewire Rust Vue.js
Alpine.js JavaScript HTML/CSS
Bootstrap REST API Kong Gateway
Postman

Real-Time
WebSocket WebRTC LiveKit FCM

Architecture & Databases
Microservices Event-Driven Kafka
gRPC Redis MySQL PostgreSQL

DevOps & Testing
Docker Nginx Linux
VPS Deployment CI/CD Laravel Pest
PHPUnit Playwright

Tools & PM
Git GitHub Jira Jenkins

STRENGTHS

- ★ API Design
- ★ Problem Solving
- ★ Clean Code
- ★ Real-Time Features
- ★ Adaptability
- ★ Team Collaboration
- ★ Fast Learner

KEY ACHIEVEMENTS

- Delivered 7 full-cycle Laravel applications across different domains.
- Contributed to a production real-time chat and calling system.
- Successfully migrated 2 legacy CodeIgniter applications to Laravel.
- Completed 10+ freelance Laravel projects across diverse client requirements.

EDUCATION

B.S. Software Engineering
University of Management and Technology,
Lahore
2016 – 2021
